DETAILED ACTION

Election/Restrictions

This application contains claims 7, 9, 10, 11, 16, 30 and 31 that are drawn to an invention nonelected with traverse in the Response to the Election/Restriction of June 29, 2005. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 24 and 27 are rejected under 35 U.S.C. 102(e) as being anticipated by Moroo U.S. Patent Application Publication US2002/0136469.

See Figures 1 and 5, for example.

Claim 24 sets forth: "A monitor program for a projection apparatus, the program monitoring a projection apparatus having projection section for projecting an image, the program comprising:

allowing a computer to execute a process of loading with a one-dimensional line

sensor an actual projected image projected by said projection section and detecting an error in said projection section on the basis of the loaded actual projected image."

See the SUMMARY OF THE INVENTION starting with section [0015] and ending with section [0038]. See the Flowcharts of Figures 2 and 3, for example.

Claim 27 is rejected for the same reasons already applied to rejected claim 24.

Allowable Subject Matter

Claims 2, 3, 5, 6, 8, 12-15, 17,18, 19, 21-23, 25, 26, 28 and 29 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record neither shows nor suggests all of the elements of claim 2, in combination, including a "projection section", an "image loading section", an "error detection section", and an "error notification section" and particularly:

"wherein said error detection section detects errors in said projection section on the basis of an original projected image to be projected by said projection section and the actual projected image loaded into said image loading section and said image loading section is a one-dimensional line sensor.".

Claims 17 and 19 are allowable for essentially the same reasons.

The prior art of record neither shows nor suggests all of the steps of claim 25 and particularly:

"allowing execution of a process implemented as image loading section including a one-dimensional line sensor for loading the actual projected image projected by said

projection section for detecting errors in said projection section on the basis of the actual projected image loaded into said image loading section, with error detection section, and carrying out a predetermined notification when said error detection section detects an error with error notification section, and

wherein said error detection section detects errors in said projection section on the basis of an original projected image to be projected by said projection section and the actual projected image loaded into said image loading section.”.

Claim 26 is allowed for essentially the same reasons.

The prior art of record neither shows nor suggests all of the steps of claim 28 and particularly:

“loading the actual projected image projected by said projection section, with a one-dimensional line sensor, detecting an error in said projection section on the basis of the loaded actual projected image, and carrying out a predetermined notification when an error is detected,

wherein said error detection detects an error in said projection section on the basis of an original projected image to be projected by said projection section and the actual projected image that was loaded.”.

Claim 29 is allowed for essentially the same reasons.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kajita U.S. Patent 4,954,913 teaches an image reading apparatus.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
